

FACILITY ONBOARDING TEMPLATE

Compound Risk Detection Engine — Add Facility Document

Facility Name: _____

Prepared By: _____

Designation: _____

Date Prepared: _____

Instructions: Complete every section below as thoroughly as possible. Add extra rows to any table if you have more entries than space provided. Sections left blank will be flagged during AI validation and you will be asked follow-up questions to complete them. Once complete, convert this document to PDF and upload it in the Add Facility screen.

1. Facility Overview

Facility / Plant Name: _____

Physical Address: _____

Industry Sector (e.g. Steel, Thermal Power, Chemical/Pharma, Refinery):

Operating Company: _____

Commissioning Date: _____

Installed Capacity (e.g. 600 MW, 3 MTPA):

List every major department/unit in the facility (add rows as needed):

Department / Unit Name	Primary Function	Approx. Headcount

Provide a brief narrative overview of what this facility does, end to end:

: _____

: _____

: _____

: _____

: _____

: _____

2. Process Flow Description

Describe the process step by step, from raw material intake to final product/output. Reference major equipment by name. If a Process Flow Diagram (PFD) or P&ID exists, attach it as an appendix and reference the relevant drawing numbers below.

: _____

: _____

: _____

: _____

: _____

: _____

: _____

: _____

: _____

: _____

Referenced drawing numbers (P&ID / PFD), if attached as appendix:

Drawing Number(s): _____

3. SCADA / DCS Systems

List every SCADA (Supervisory Control and Data Acquisition) or DCS (Distributed Control System) installed at this facility.

System Name	Vendor	Version	Primary Function	Redundant? (Y/N)

Historian System (if any): _____

Network Architecture Notes (e.g. air-gapped, IT/OT segregation):

4. Sensor & Instrumentation Details

List every sensor/instrument that should be monitored by the risk detection platform. Add as many rows as needed — this is the single most important table in this document.

Tag ID	Instrument Name	Location	Type	Unit	Normal Range	Alarm Threshold

4.1 Real-Time Data Integration (API Access)

If sensor readings are available via a JSON API (recommended), provide connection details below for each system. If not yet available, leave blank — you can configure this later in the portal.

API Base URL: _____

Authentication Method (e.g. API key, Bearer token, none):

Polling Frequency (e.g. every 30 seconds): _____

5. Key Personnel

5.1 Managerial Staff

Name	Designation	Department	Email	Phone

5.2 Maintenance Staff

Name	Role	Shift	Email	Phone	Certifications

5.3 Safety Officers

Name	Role	Email	Phone

5.4 Escalation Logic

Describe who is contacted, in what order, for each severity of incident. Add rows for as many escalation levels as your facility uses.

Level	Trigger Condition	Contact / Role	Response Time Expected
1 — First Responder			
2 — Shift Engineer			
3 — Plant Head			
4 — Corporate / Regulatory			

6. Shift & Workforce Patterns

List all shift timings observed at this facility:

Shift Name	Start Time	End Time	Typical Headcount
Shift A			
Shift B			
Shift C			

Describe the shift changeover / handover protocol — what is checked, communicated, and signed off between outgoing and incoming shifts:

:

:

:

:

:

:

7. Maintenance Records & Timelines

List major equipment and their maintenance history. Explicitly note any deferred or overdue maintenance items — this is critical information for risk detection.

Equipment	Last Maintenance Date	Type	Next Scheduled	Performed By	Deferred? Notes

8. Incident & Negligence History

List any prior incidents, near-misses, safety violations, or regulatory citations at this facility, even if minor. Patterns of recurrence are especially important for risk modeling.

Date	Incident Description	Root Cause (if known)	Corrective Action Taken	Recurred? (Y/N)

Is there any broader history of negligence (e.g. deferred safety audits, understaffing, ignored worker complaints) that may make this facility more susceptible to future incidents? Describe below:

:

:

:

:

:

:

9. Employee Directory

Provide full details for all on-site employees relevant to safety operations. This information is used for shift-correlation analysis and emergency response — please complete every column.

Name	Role / Dept.	Email	Phone	Blood Group	Working Hours	Working Days	Emergency Contact (Name / Phone / Relation)

10. Attendance & Access Control Systems

System Name / Vendor: _____

API Base URL (if available): _____

Authentication Method: _____

Data Format (e.g. JSON, CSV export): _____

11. Utility & Support Systems

List critical utility systems that support plant operations. Failures in these systems often compound with primary process risks (e.g. a power backup failure during a sensor fault).

Utility System	Type / Vendor	Backup / Redundancy	Last Tested Date
Emergency Power Backup (DG Set / UPS)			
Compressed Air System			
Water Treatment / Cooling Water			
Fire Water System			
HVAC (Control Room / Critical Areas)			

12. Training & Certification Records

Summarize the safety training program in place. Individual employee certifications should already be captured in Section 9; this section covers program-level information.

Safety Induction Program (frequency, duration):

Mock Drill Frequency (fire, evacuation, gas leak, etc.):

Date of Last Mock Drill:

Contractor / Third-Party Worker Safety Training Process:

13. Environmental & Quality Compliance

Environmental Clearance / Consent to Operate (reference number):

Pollution Control Board Registration: _____

Quality Management System Certification (e.g. ISO 9001, if any):

Environmental Management System Certification (e.g. ISO 14001, if any):

Occupational Health & Safety Certification (e.g. ISO 45001, if any):

14. Emergency Response & Compliance

List applicable regulatory standards this facility operates under:

Regulatory Standards (e.g. Factory Act, OISD, DGMS, CEA guidelines):

Fire Safety Systems Present (hydrant, sprinkler, detection, etc.):

Date of Last Safety Audit: _____

Summarize key findings from the last safety audit, if any:

: _____

: _____

: _____

: _____

Declaration

I confirm that the information provided in this document is accurate and complete to the best of my knowledge at the time of submission.
